ElasticSeach, Docker

EDUCATION

Bachelor in
Computer Science

Bangalore,
India

PROJECTS

Car Parking App

an app to check how many car slots are available in the parking and assign a customer the closest available slot with their car registration no & color.

Watermark Image service

after getting inspired by Shutterstock, I created this app that can be used as a SaaS to upload a high quality RAW image and the app would optimize it to make 3 copies with watermark that can be used as dummies.
